

RSK 3131161

Air admittance valve 110 is used for primary air admittance, for example for venting of the main pipe at the top of the drain. It is designed to prevent negative pressure from forming in the system, and should be placed in a well-ventilated area. The air admittance valve has an air flow capacity of 79l/s at a negative pressure of 250Pa. The air admittance valve is CE marked and meets the requirements of SS-EN12380 B2. Supplies with an insulating styrofoam cover to prevent condensation.

## Specifications

<b>RSK Number</b>	3131161
<b>Function</b>	Equalises suppression
<b>Item Color</b>	White
<b>Material</b>	ABS
<b>Outlet Dimension</b>	Ø110 mm
<b>Pressure Flow Temp</b>	79 l/s
<b>Version</b>	Spigot end
