

RSK 7129958

Filter bucket BH50 in acid-resistant stainless steel with a volume of 1.1 liters. The filter bucket is used to collect particles larger than 2 mm, e.g. fish fry, so they do not disappear out of the facility. The filter bucket has a handle which means that when you place it in the water trap and turn it under the handle on the water trap, it is kept depressed and fixed. The filter bucket is picked up for emptying and reassembled. Fits the floor drains Bigg and Heavy with stainless steel water trap.

Specifications

RSK Number	7129958
Material	Acid-resistant stainless steel 1.4404
Surface	Pickled
Flow	0,3
Item Color	Stainless
Pressure Flow Temp	0,3 l/s
Outlet Dimension	Ø220 mm
Electrical Data	1,1 l
