

RSK 2910414

Rot WC connector for central connection of a WC to a 4" cast iron pipe with gasket. Suitable for WCs with S-Traps and P-Traps, and for connection to either the floor or wall. Supplied with a connection ring for easier installation of the sealing membrane. If necessary, the WC connector can be split for installation with pipes at higher levels. The upper part of the connector has a thin membrane which can easily be cut off at the time of installation.

Specifications
